

Introduce yourself

Tell me about your project

What is OOPs

Abstraction and encapsulation with example

Difference between arraylist and linked list

Difference between hashset and linked list

SQL query

Bubble sort

Fibonacci series using recursion

Method overloading and method overriding.

oops concept

Abstract class vs interface

What is extends thread, implements runnable

Sql query rank

What is spring

Bubble sort

One mind bearer ques

Constructor

Oops

Project

Highest sal query

String occurrence program

Distinct keyword

1.explain string

2.why immutable

3.snippets related to strings

4.explain project

5.rate yourself in java

6.linked list reverse

7.what is the entry point in react

8.how you configure your back end with database

9.how react works

10.what is rendering?

11.explain how will you display page on server,what will you do in front end?

Introduce yourself

Technologies learnt in CDAC

abstract vs interface

4 pillars of oops with explain

sql query for salary>=25000

exception handling

error vs exception

is method defination in interface or not

codes:

[-1,-2,-3,-4,-5,1,2,3,5]

find out the the missing number

find the maximum number

find the second maximum number

Difference between interface and abstract class

Linux commands

Oops concepts and examples

String reverse program

How to modify string

Multiple inheritance in java

Difference between string buffer and string builder

Introduction,
Java8 features,
Linked List, HashMap, HashSet
Oops concepts with example
Reverse linked list
Equal to operator and equals method

introduction
class A example from previous interview pdf
String and string pool
type casting and autoboxing
exception handling
throw and throws keyword
access modifiers
arraylist vs hashmap and when to use which
explain project
spring boot
entry point of spring boot app
annotations
types of joins
simple join query
pillars of oops
finally
what is hibernate and why use it
mapping in controller class
Springboot
RestController
Jsp vs Servlet working

Join query ranking function

Jsp tags...

Attribute vs parameter

way to make Httpstateful

Ploymorphysm

Spring mvc detail working .

Polymorphism

String reverse

Sorting techniques

Spring

Different databases

Project implementation

React basics such as state handling

Pack of cards implementation using collections.

Plugins used in eclipse

What is Maven

About Project

Database query

1.What is dependency injection

2.spring

3.project

4.diff between abstracti and encapsulation

5.how you have used oops in project

6.how to deploy ur project

7.generics

8.linked list implementation

8.arraylist

explain project

spring boot

why use restful api

hibernate

multithreading

exception handling

front and backend interfacing

exception handling

collection api

queries on project databases

static and static block

question on switch statement

explain logic to find if a number is prime

Project explanation

Stored procedure

BE project

Sorting algorithm

Linked list

Arraylist

MySQL mongodb difference

OOPS concepts with example

Concept of overloading and overriding

Bubble sort algo

Stored procedure and difference between stored procedure and normal query
